ABOUT US

QUEENSPACK is a full service cosmetic and personal care packaging manufacturing company who has been silent partners with many of the beauty industry's biggest names and most promising start-ups for over 30 years.

上海君仕新材料有限公司QUEENSPACK, 专业从事化妆品包装研制设计开发已近30年历史。

作为业内诚信制造商, 君仕主要产品有塑料制膏霜瓶, 乳液瓶, 真空瓶, 散粉盒, 口红管等。

同时作为业内资深制造商及持久不变的认真负责态度, 君仕和广大国内外客户(尤其是德国及瑞士等欧洲客户)建立了深厚及坚不可摧的合作和信任基础。

君仕为来自五湖四海的客户在上海提供了专业的样品展览室, 使得客户可以一步到位欣赏和选择其需求的包装产品。

君仕拥有专业知识背景的业务团队负责国内外市场, 每天有条不紊的快速处理庞大的客户需求, 及提供专业的包装建议。

君仕拥有资深的设计队伍每日研发新品包装及改善陈旧包装观念, 为各个类别客户不断提供惊喜。

君仕拥有独立的QC团队, 对生产线进行定期质检及不定期抽检以保证质量, 为客户免去后顾之忧。

We are ISO 9001 certified, 30,000m² manufacturing facility in Zhejiang City-PRC, provides its global clientele factory direct efficiencies, combined with personalized customer service support from sales offices in Shanghai and Los Angeles.

Industry renowned for in house design, modeling, & mold design, we employ a dedicated customer service oriented team of 200+ employees.

We are committed to exceeding your expectations and to bringing your concept to market on time, in full, and on budget!

Honesty & Trust is our principle, we will create a win-win situation between you and us.

can be used for face cream, face mask, body cream, body butter, nail gel and so on.

WHAT IS PCR?

(POST-CONSUMER RECYCLED)

PCR: Short of Post-Consumer-Recycling, is recycled plastic made from discarded items such as plastic milk and drinks and is an environmentally sustainable solution for reusing single-use materials that would otherwise be disposed of in landfill sites.

The production of PCR begins with the collection and sorting of these discard plastics in commercial and residential recycling programs. The recovered items are ground, washed, dried and pelletised-ready to be used again in the future manufacturing.

WHAT IS PCR?

(POST-CONSUMER RECYCLED)

PCR: Short of Post-Consumer-Recycling, is recycled plastic made from discarded items such as plastic milk and drinks and is an environmentally sustainable solution for reusing single-use materials that would otherwise be disposed of in landfill sites.

The production of PCR begins with the collection and sorting of these discard plastics in commercial and residential recycling programs. The recovered items are ground, washed, dried and pelletised-ready to be used again in the future manufacturing.

Refillable bottle:
PP inner bottle can be easily taken out.

QS2018R

PP PCR available(30%-100%)

120ml toner bottle
with reducer

Treatment pump for lotion or serum.

15ml,30ml,60ml,100ml with
treatment pump for
lotion or serum

Mono-material for bottle:
PP outer bottle, PP inner bottle.

Cost-effective
refillable PP jar

100% Recyclable
PP materials

Refillable inner jar,
flat mouth seals by HIS
(Heat Induction seal)

Custom decorations are all available

silver metallization

pearl color injection

color injection with frosting

glossy solid color injection

WHAT IS Refillable Packaging?

The concept of refillable is: buy the original bottle once and then refill it from something more eco-friendly. Usually this means a combination of less plastic, less wasted lorry space and sometimes less water used for the same amount of the product.

The benefit of refillable packaging

- Refillable bottles can drastically reduce the number of single-use bottles being thrown out.
- Increasing the share of refillable and decreasing marine plastic pollutions of bottles is achievable.
- Potential cost reductions: Though switching to recyclable packaging may require an initial investments, it's possible you can reduce costs by reducing the amount of material that needs to be reduced overall.
- Improves the consumer experience by offering products from known brands in durable, refillable packaging with an enhanced look, feel or functionality.

WHAT IS Metal-Free Pump?

No metal spring, No metal bead

- Eco Friendly Pump, easy to be recycled.
- Ingredients have No chance to touch directly with the metal.
The pumps are free from metal, making them safe from chemical danger and ideal for lotions, shampoos, body gels, and liquid soaps.
- Streamline the ease of recycling by using the metal free components for your formulas.

Pumps update from inside spring pump to outside spring one, from a traditional priming to a NO direct-touch pump with ingredients. And now pumps change to all metal-free as a more sustainable package for eco-friendly life.
